Sint Annabaai

LOCATION
Willemstad, Curaçao

CLIENT
Curaçao Port Authority

MARKET
Waterfront Planning & Design

Sint Annabaai sets a unique stage for the ensemble of buildings and public spaces protected by UNESCO World Heritage designation. The Curaçao Ports Authority's mission embodies the core values of putting the waterfront to work for the social and economic benefit of Curaçao. LandDesign, with project collaborators 505Design, prepared a vision for the inner harbour calls for a balanced, incremental redevelopment of portions of the waterfront, while also recommitting other areas for continued, intensive maritime use. The vision draws from the framework of promoting connectivity, community, culture and commerce, maximizing these principles throughout the entirety of the inner harbour and within the respective study areas of the master plan at Scharloo, Otrobanda, Waaigat and the North District. Extensive stakeholder and community outreach was a key feature in plan assembly.
